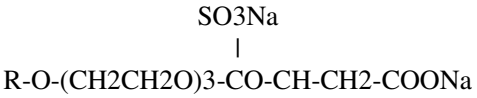
PRODUCT SPECIFICATION

TEQPON SE

CHEMICAL NAME

Disodium Laureth Sulfosuccinate.
TEQPON SE is the sodium salt of the sulphosuccinic half-ester of an ethoxylated fatty alcohol.

The structural formula:



SPECIFICATION

Appearance	Liquid
Active Matter(dry)	Min. 39%
pH, %5 solution	5,5 – 7,0
Character	Anionic

USES:

TEQPON SE is a mild and non-irritating foaming base for cosmetic and cleansing formulations.

TEQPON SE is exceptionally eye-and skin friendly.

TEQPON SE is recommended for mild toiletries, especially baby shampoos, bubble baths and shower preparations.

TEQPON SE is the preferred sulphosuccinate for formulating shampoos because of its fluidity and its lack of viscosity stability problems.

PACKAGING AND STORAGE:

TEQPON SE is supplied in polyethylene drums.
It is advisable to store TEQPON SE for a limited time only.
